Project Description

The San Dieguito Wetlands Restoration Project will restore 150 acres of coastal wetlands in the San Dieguito River Valley within the City of Del Mar and City of San Diego. Approximately taking 3 years to complete, the restoration's main features include:

- restoring tidal wetlands areas
- constructing berms & associated drainage and slope protection measures
- vegetating dredge disposal areas
- constructing nesting sites
- improving beach access along the river from Camino Del Mar
- excavating & maintaining the San Dieguito river inlet channel to maintain tidal exchange

Project Team Highlight

RECON has over 34 years experience providing NEPA and CEQA services and compliance with the Clean Water Act, Clean Air Act, Endangered Species Act, and other federal, state, and local regulations for clients throughout the western United States.

As part of the team, Recon Environmental provides biological resources, plant salvation and protection, vegetation restoration and planting services for the San Dieguito Wetlands Mitigation project.
