San Dieguito Wetlands Project Work Areas

Excavation Work in Area 2A

Water Truck Minimizing Dust in Area 3

Plant Nursery for Project

Project Description

The San Dieguito Wetlands Restoration Project will restore 150 acres of coastal wetlands in the San Dieguito River Valley within the City of Del Mar and City of San Diego. Approximately taking 3 years to complete, the restoration's main features include:

- restoring tidal wetlands areas
- constructing berms & associated drainage and slope protection measures
- vegetating dredge disposal areas
- constructing nesting sites
- improving beach access along the river from Camino Del Mar
- excavating & maintaining the San Dieguito river inlet channel to maintain tidal

Project Team Highlight

Since its inception in 1989, Construction Testing & Engineering (CTE) has offered an integrated compilation of construction design and inspection services to the development and construction of various communities.

As part of the team, CTE specifically provides geotechnical engineering, special inspections, and testing services for the San Dieguito Wetlands Restoration project.
