Work Areas of San Dieguito Wetlands Project

Dumping Least Tern nesting site sand

Dozer cutting grade in water in Area 3, north of river

### Project Description

The San Dieguito Wetlands Restoration Project will restore 150 acres of coastal wetlands in the San Dieguito River Valley within the City of Del Mar and City of San Diego. Taking approximately 3 years to complete, the restoration's main features include:

- restoring tidal wetlands areas
- constructing berms & associated drainage and slope protection measures
- vegetating dredge disposal areas
- constructing nesting sites
- improving beach access along the river from Camino Del Mar
- excavating & maintaining the San Dieguito river inlet channel to maintain tidal exchange

### Project Team Highlight

Founded in 1988, Coastal Environments is a unique multi-disciplinary oceanographic, coastal engineering, and environmental consulting firm.

Coastal Environments has been monitoring the San Dieguito Lagoon since 1992 for Southern California Edison and continues to provide construction management services for the San Dieguito Wetlands Restoration Project.
